CONTENTS

Volume 36, Issue Nos. 1–24 (1993)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Large Reference Displacement Analysis of Composite Plates Part I: Finite Element Formulation: J. M. Kremer, A. A. Shabana and G. E. O. Widera 1

Large Reference Displacement Analysis of Composite Plates Part II: Computer Implementation: J. M. Kremer, A. A. Shabana and G. E. O. Widera 17

On the Numerical Integration of Interface Elements: J. C. J. Schellekens and R. De Borst 43

A Laplace-transform-based Three-dimensional BEM for Poroelasticity: T. Badmus, A. H.-D. Cheng and S. Grilli 67

A Hybrid Variational Method for Multibody Dynamics: S. Chung and E. J. Haug . . . 87

p-Version Least-squares Finite Element Formulation for Convection–Diffusion Problems: D. Winterscheidt and K. S. Surana. 111

An Inverse Approach to Three-dimensional Solidification Problems: A. N. Alexandrou, R. Elden and J. McConnell 135

Hygrothermomechanical Evaluation of Porous Media Under Finite Deformation. Part I—Finite Element Formulations: S. H. Advani, T. S. Lee, J. K. Lee and C. S. Kim . . . 147

Hygrothermomechanical Evaluation of Porous Media Under Finite Deformation. Part II—Model Validations and Field Simulations: C. S. Kim, T. S. Lee, S. H. Advani and J. K. Lee 161

Issue No. 2

Triangular C^0 Bending Elements Based on the Hu–Washizu Principle and Orthogonality Conditions: C. Karakostas, D. Talaslidis and G. Wempner 181

On Improved Predictions for Structural Equilibrium Path Evaluations: A. Eriksson . . 201

Boundary Element Analysis of Two-dimensional Elastoplastic Contact Problems: G. Karami 221

Non-singular Boundary Integral Equation Implementation: T. A. Cruse and R. Aithal . 237

Indexed or abstracted by 'Abstract Jnl. in Earthquake Engineering', 'Applied Mechanics Review', 'BHRA Fluid Engineering Centre', 'Boundary Element Abstracts', 'CITIS-Civil Engineering Abstracts', 'Compumath Citation (ISI)', '(CC)/Eng, Tech and Applied Sciences', 'Engineering Index Inc', 'Eng. Societies Library', 'Fluid Abstracts and FLUIDEX', 'Geodex', 'Geotechnical Abstracts', 'Indian Society of Earthquake Technology', 'INSPEC', 'Int. Petroleum Abstracts', 'Materials Information', 'Mathematical Reviews', 'Mechanics', 'Newsletter of Engineering Analysis Software', 'Research Alert (ISI)', 'Science Citation Index (ISI)', 'SCISEARCH Database (ISI)', 'Tribiology and Corrosion Abstracts', 'Zentrablatt für Mathematik'.

An Application of Preconditioned Conjugate Gradients to Relative Placement in Chip Design: C. Kredler, C. Zillober, F. Johannes and G. Sigl 255

Application of Block Lanczos Method for Analysis of Cyclic Symmetric Structures: P. Balasubramanian, J. G. Jagadeesh, H. K. Suhas and V. Ramamurti 273

Interpolation of Curved Shell Geometries by Low Order Finite Elements—Errors and Modifications: H. Gebhardt and K. Schweizerhof 287

An Efficient Implementation of Stress Resultant Plasticity in Analysis of Reissner–Mindlin Plates: A. Ibrahimbegović and F. Frey 303

Solution of the Helmholtz Eigenvalue Problem via the Boundary Element Method: S. M. Kirkup and S. Amini 321

Elastic Postbuckling Analysis via Finite Element and Perturbation Techniques Part II: Application to Shells of Revolution: F. G. Flores and L. A. Godoy 331

ANNOUNCEMENT 355

ERRATA 356

CONFERENCE DIARY 357

Issue No. 3

Generalized Midpoint Finite Element Dynamic Analysis of Elastoplastic Systems: A. Corigliano and U. Perego 361

Quartz Resonator Frequency Shifts Computed Using the Finite Element Method: L. D. Clayton and E. P. Eernisse 385

A Numerical Method for Solving the Two-dimensional Unsteady Solidification Problem with the Motion of Melt by Using the Boundary-fitted Co-ordinate System: M. Saitou and A. Hirata 403

Numerical Methods for Second-order Shape Sensitivity Analysis with Applications to Heat Conduction Problems: G. J.-W. Hou and J. Sheen 417

Boundary Element Method Solutions for Elastic Wave Scattering in 3D: P. J. Schafbuch, F. J. Rizzo and R. B. Thompson 437

The Effect of Ordering on Preconditioned GMRES Algorithm, for Solving the Compressible Navier–Stokes Equations: L. C. Dutto 457

An Algorithm for Adaptive Refinement of Triangular Element Meshes: R. V. Nambiar, R. S. Valera, K. L. Lawrence, R. B. Morgan and D. Amil 499

An Approach to Optimal Design of Structures with Non-linear Response: M. M. Oblak, M. Kegl and B. J. Butinar 511

Computation of Heat Conduction in Materials with Random Variable Thermophysical Properties: B. M. Nicolaï and J. de Baerdemaeker 523

CONFERENCE DIARY 537

Issue No. 4

The Problem of the Selection of an *a Posteriori* Error Indicator Based on Smoothening Techniques: I. M. Babuška and R. Rodríquez 539

An Augmented Lagrangian Method for Discrete Large-slip Contact Problems: J.-H. Heegaard and A. Curnier 569

The Effect of Non-linear Curvature Strains on the Buckling of Laminated Plates and Shells: S. T. Dennis and A. N. Palazotto 595

A Bilinear Shell Element with the Cross-reduced Integration Technique: Z.-H. Zhong 611

A Rectangular Finite Element for Analysing Composite Multilayered Shallow Shells in Statics, Vibration and Buckling: A. Beakou and M. Touratier 627

Modelling of Thick Composites Using a Layerwise Laminate Theory: D. H. Robbins, Jr. and J. N. Reddy 655

On the Generalized L_2 Galerkin Finite Element Method for Linear Hyperbolic Equations: P. Bar-Yoseph, D. Elata and M. Israeli 679

Vibration of Shear-deformable Rectangular Plates Using a Spline-function Rayleigh–Ritz Approach: S. Wang and D. J. Dawe 695

CONFERENCE DIARY 713

Issue No. 5

Moving-grid Finite Element Modelling of Thermal Ablation and Consolidation in Porous Media: R. J. Mackinnon and G. F. Carey. 717

Automatic Partitioning of Unstructured Meshes for the Parallel Solution of Problems in Computational Mechanics: C. Farhat and M. Lesoinne 745

Trefftz Method for Kirchhoff Plate Bending Problems: W. G. Jin, Y. K. Cheung and O. C. Zienkiewicz 765

Boundary Stress Calculation Using Regularized Boundary Integral Equation for Displacement Gradients: T. Matsumoto, M. Tanaka and H. Hirata 783

Boundary Element Solution of Heat Conduction Problems in Multizone Bodies of Non-linear Material: R. Bialecki and G. Kuhn 799

Superconvergent Extraction Techniques for Finite Element Analysis: Q. Niu and M. S. Shephard 811

Finite Element Simulation of Adaptive Bone Remodelling: A Stability Criterion and a Time Stepping Method: T. P. Harrigan and J. J. Hamilton. 837

An ALE Hydrodynamic Lubrication Finite Element Method with Application to Strip Rolling: Y.-K. Hu and W. K. Liu 855

LETTER TO THE EDITOR 881
AUTHORS' REPLY 883
BOOK REVIEW 885
BOOKS RECEIVED 887
CONFERENCE DIARY 889

Issue No. 6

An *h–p*-Multigrid Method for Finite Element Analysis: D. A. Field and Y. Pressburger 893
Work-increment-control Method for Non-linear Analysis: H. Chen and G. E. Blandford 909
Singularity in Structural Optimization: S. N. Patnaik, J. D. Guptill and L. Berke . . . 931
A Naturai Partitioning Scheme for Parallel Simulation of Multibody Systems: J. C. Chiou, K. C. Park and C. Farhat 945
A Variational Boundary Integral Equation Method for an Elastodynamic Antiplane Crack: E. Becache. 969
A Generalized Forward Gradient Procedure for Rate Sensitive Constitutive Equations: M. L. Wenner. 985
A New 3-D Finite Element Model to Evaluate Added Mass for Analysis of Fluid–Structure Interaction Problems: J. Rajasankar, N. R. Iyer and T. V. S. R. Appa Rao 997
Axially-loaded Damped Timoshenko Beam on Viscoelastic Foundation: Y.-H. Chen and J.-T. Sheu 1013
Multigrid Solution of the 3-D Compressible Euler Equations on Unstructured Tetrahedral Grids: J. Peraire, J. Peiro and K. Morgan 1029
Non-linear Analysis of Rectangular Laminates Under End Shortening, Using Shear Deformation Plate Theory: S. S. E. Lam, D. J. Dawe and Z. G. Azizian. 1045
AUTHORS' REPLY 1065
CONFERENCE DIARY 1067

Issue No. 7

A Discrete Momentum-conserving Explicit Algorithm for Rigid Body Dynamics Analysis: K. C. Park and J. C. Chiou 1071
Explicit Thickness Integration for Three-dimensional Shell Elements Applied to Non-linear Analysis: M. Mahe, J. C. Sourisseau and R. Ohayon 1085

An U-ALE Formulation of 3-D Unsteady Viscoelastic Flow: F. P. T. Baaijens 1115

Shell Elements with Drilling Degree of Freedoms Based on Micropolar Elasticity Theory: J.-T. Yeh and W.-H. Chen 1145

A Displacement-based Geometrically Non-linear Constant Stress Element: A. Bout . . 1161

Static and Dynamic Analysis of Space Frames Using Simple Timoshenko Type Elements: R. Kouhia and M. Tuomala 1189

General Behaviour of Collapsed 8-Node 2-D and 20-Node 3-D Isoparametric Elements: G. Dhondt 1223

LETTERS TO THE EDITOR 1245

CONFERENCE DIARY 1249

Issue No. 8

An Asymptotic-numerical Method to Compute the Postbuckling Behaviour of Elastic Plates and Shells: L. Azrar, B. Cochelin, N. Damil and M. Potier-Ferry 1251

A Posteriori Pointwise Upper Bound Error Estimates in the Finite Element Method: J. D. Yang, D. W. Kelly and J. D. Isles 1279

Buckling of Thick Skew Plates: S. Kitipornchai, Y. Xiang, C. M. Wang and K. M. Liew 1299

EAS-Elements for Two-dimensional, Three-dimensional, Plate and Shell Structures and their Equivalence to HR-Elements: U. Andelfinger and E. Ramm 1311

Post-buckling Analysis of Structures by Dynamic Relaxation: G. Ramesh and C. S. Krishnamoorthy 1339

On a Class of Constitutive Equations in Viscoplasticity: Formulation and Computational Issues: D. Perić 1365

A Penalty Finite Element Method for Non-Newtonian Creeping Flows: R. Codina, M. Cervera and E. Ōnate 1395

Further Development of a Three-node Triangular Shell Element: R. D. Cook 1413

CONFERENCE DIARY 1427

Issue No. 9

Three-dimensional Solid-to-beam Transition Elements for Structural Dynamics Analysis: T. C. Gmür and R. H. Kauten 1429

Stability Analysis of the Forward Euler Scheme for the Convection–Diffusion Equation Using the SUPG Formulation in Space: R. Codina 1445

Dynamic Analysis of Concrete Pavements Resting on a Two-parameter Medium: M. Zaman, A. Alvappillai and M. R. Taheri 1465

Experimental and Finite Element Predictions of Residual Stresses Due to Orthogonal Metal Cutting: A. J. Shih and H. T. Y. Yang 1487

Transient Analysis of Geometrically Linear and Non-linear Structures by a Combined Finite-element–Riccati-transfer Substructure Method: J. Zhu and H. Xue 1509

Hybrid Hexahedral Element for Solids, Plates, Shells and Beams by Selective Scaling: K. Y. Sze and A. Ghali 1519

Large Displacement Transient Analysis of Flexible Structures: D. L. Rice and E. C. Ting 1541

A General Boundary-integral Formulation for Zoned Three-dimensional Media: M. Rezayat. 1563

A Survey of Quasi-Newton Methods with Reduced Storage: M. Papadrakakis and G. Pantazopoulos 1573

The 'Fractal Assumption' in Cracks: Bilateral Calculation Methods: P. S. Theocaris and P. D. Panagiotopoulos 1597

CONFERENCE DIARY 1605

Issue No. 10

Regularization of Hypersingular and Nearly Singular Integrals in the Potential Theory and Elasticity: V. Sladek, J. Sladek and M. Tanaka 1609

Analysis of the Anisotropic Viscoplastic–Damage Response of Composite Laminates—Continuum Basis and Computational Algorithms: A. F. Saleeb and T. E. Wilt . . . 1629

A New Family of Continuous/Discontinuous Three-dimensional Boundary Elements with Application to Acoustic Wave Propagation: J. J. Rêgo Silva, L. C. Wrobel and J. C. F. Telles 1661

Frictional Contact Finite Elements Based on Mixed Variational Principles: S. Cescotto and R. Charlier 1681

An Adaptive Multigrid Technique for Three-dimensional Elasticity; M. Kočvara . . . 1703

A Normal Offsetting Technique for Automatic Mesh Generation in Three Dimensions: B. P. Johnston and J. M. Sullivan, Jr.. 1717

A Multiple-node Method to Resolve the Difficulties in the Boundary Integral Equation Method Caused by Corners and Discontinuous Boundary Conditions: A. K. Mitra and M. S. Ingber 1735

New Strategy for Assumed Stresses for 4-node Hybrid Stress Membrane Element: K.-Y. Yuan, Y.-S. Huang and T. H. H. Pian 1747

Calculation of Wave Forces on Offshore Structures using Parallel Computers: N. Hardy, M. J. Downie, P. Bettess and J. M. R. Graham. 1765

CONFERENCE DIARY 1785

Issue No. 11

Explicit Time-domain Transmitting Boundary for Dam–Reservoir Interaction Analysis: R. Yang, C. S. Tsai and G. C. Lee 1789

Generation of Unstructured Tetrahedral Meshes by Advancing Front Technique: H. Jin and R. I. Tanner 1805

Elastic Stability of Skew Laminated Composite Plates Subjected to Biaxial Follower Forces: C.-L. Liao and Z.-Y. Lee. 1825

A Numerical Treatment to the Solution of Quasiparabolic Partial Differential Equations: P. Chocholaty. 1849

A New Discrete Kirchhoff–Mindlin Element Based on Mindlin–Reissner Plate Theory and Assumed Shear Strain Fields—Part I: an Extended DKT Element for Thick-plate Bending Analysis: I. Katili. 1859

A New Discrete Kirchhoff–Mindlin Element Based on Mindlin–Reissner Plate Theory and Assumed Shear Strain Fields—Part II: an Extended DKQ Element for Thick-plate Bending Analysis: I. Katili 1885

Three-dimensional Analysis of Thermally Loaded Cracks: S. T. Raveendra, P. K. Banerjee and G. F. Dargush 1909

Construction of Stiffness Matrices to Maintain the Convergence Rate of Distorted Finite Elements: M. S. Ingber and H. L. Schreyer 1927

Convex Multilevel Decomposition Algorithms for Non-monotone Problems: G. E. Stavroulakis and P. D. Panagiotopoulos 1945

Issue No. 12

State-space Representation and Optimal Control of Non-linear Material Deformation using the Finite Element Method: R. V. Grandhi, A. Kumar, A. Chaudhary and J. C. Malas. 1967

A Lanczos-based Technique for Exact Vibration Analysis of Skeletal Structures: H. A. Smith, D. C. Sorensen and R. K. Singh 1987

Lagrangian Finite-element Analysis of Time-dependent Viscous Free-surface Flow using an Automatic Remeshing Technique: Application to Metal Casting Flow: F. Muttin, T. Coupez, M. Bellet and J. L. Chenot. 2001

A New Approach to 2-D Eigenvalue Shape Design: Yu. A. Melnikov and S. A. Titarenko 2017

A Finite Element Procedure for Axisymmetric Elastomeric Solids under General Loading: R. E. Marusak and E. B. Becker 2031

Thin Shells with Finite Rotations Formulated in Biot Stresses: Theory and Finite Element Formulation: P. Wriggers and F. Gruttmann 2049

A New Approach to Magnetic Field Analysis by the Dual Reciprocity Boundary Element Method: T. Yamada and L. C. Wrobel 2073

Discontinuous Displacement Approximation for Capturing Plastic Localization: R. Larsson, K. Runesson and N. S. Ottosen 2087

High-order Integration of Smooth Dynamical Systems: Theory and Numerical Experiments: M. Austin 2107

On a Finite Element Method for Dynamic Contact/Impact Problems: R. L. Taylor and P. Papadopoulos 2123

CONFERENCE DIARY 2141

Issue No. 13

A Finite Element Analysis of Rubber Coextrusion using a Power-law Model: G. C. Buscaglia 2143

Symmetric Galerkin Boundary Formulations Employing Curved Elements: J. H. Kane and C. Balakrishna 2157

A Boundary Element Formulation for the Inverse Elastostatics Problem (IESP) of Flaw Detection: L. M. Bezerra and S. Saigal 2189

A Super Element Model for Non-linear Analysis of Stiffened Box Structures: J. Jiang and M. D. Olson 2203

Applications of a Super Element Model for Non-linear Analysis of Stiffened Box Structures: J. Jiang and M. D. Olson 2219

The Construction of an Optimal Weakly Divergence-free Macroelement: X. Ye and C. A. Hall 2245

Superelement Method for Transient Dynamic Analysis of Structural Systems: M. V. Belyi 2263

A Six-noded Element for Analysing Power-type Singularities Under Thermal Loads: B. K. Dutta 2287

Neural Networks for Computing in Structural Analysis: Methods and Prospects of Applications: S. Kortesis and P. D. Panagiotopoulos 2305

LETTER TO THE EDITOR. 2319

CONFERENCE DIARY 2321

Issue No. 14

Adaptively Shifted Integration Technique for Finite Element Collapse Analysis of Framed Structures: Y. Toi and D. Isobe 2323

Fundamental Frequency Analysis of Laminated Rectangular Plates by Differential Quadrature Method: J. Farsa, A. R. Kukreti and C. W. Bert 2341

A Hermite Interpolation Algorithm for Hypersingular Boundary Integrals: L. J. Gray and C. San Soucie 2357

Numerical Simulation of Ultrasonic Transmission Through Curved Interface: P. P. Goswani and T. J. Rudolphi 2369

A Numerical Investigation of the Effect of Boundary Motion on Viscous Channel Flow: B. S. Abdulnour 2395

A Boundary Element Analysis of Metal Matrix Composite Materials: A. A. Mammoli and M. B. Bush 2415

Shape Optimization using Adaptive Shape Refinement: H. S. Kohli and G. F. Carey . . 2435

A Novel Isoparametric Finite Element Displacement Formulation for Axisymmetric Analysis of Nearly Incompressible Materials: H. S. Yu, G. T. Houlsby and H. J. Burd . . . 2453

Application of Singular Quadratic Distorted Isoparametric Elements in Linear Fracture Mechanics: I. L. Lim, I. W. Johnston and S. K. Choi 2473

CONFERENCE DIARY 2501

Issue No. 15

Performace of the *h*—*p* Version of the Finite Element Method with Various Elements: I. Babuška and H. C. Elman 2503

Exact Integration of Constitutive Equations in Elasto-plasticity: M. Ristinmaa and J. Tryding 2525

A Two-dimensional Frost-heave Model for Buried Pipelines: K. R. Shah and A. G. Razaqpur 2545

A Dynamic Infinite Element for Three-dimensional Infinite-domain Wave Problems: C. Zhao and S. Valliappan 2567

Finite Element Mesh Control by Integer Programming: T. K. H. Tam and C. G. Armstrong 2581

High-order Hierarchical *A*- and *L*-Stable Integration Methods: P. W. Möller 2607

A New Boundary Element Approach for Contact Problems with Friction: O. A. Olukoko, A. A. Becker and R. T. Fenner 2625

Some Notes on Singular Integral Techniques in Boundary Element Analysis: Q. Huang and T. A. Cruse 2643

Calculation of the Move Limits for the Sequential Linear Programming Method: T.-Y. Chen 2661

CONFERENCE DIARY 2681

Issue No. 16

A Direct Application of Higher-order Parametric Programming Techniques to Structural Optimization: M. Ohsaki and J. S. Arora 2683

Patch Recovery Based on Superconvergent Derivatives and Equilibrium: N.-E. Wiberg and F. Abdulwahab 2703

A Non-recursive Lagrangian Solution of the Non-causal Inverse Dynamics of Flexible Multibody Systems: The Planar Case: R. Ledesma and E. Bayo 2725

Elastic Interactions of a Fatigue Crack with a Micro-defect by the Mixed Boundary Integral Equation Method: Y. J. Lua, W. K. Liu and T. Belytschko 2743

Sweepline Algorithm for Unstructured-grid Generation on Two-dimensional Non-convex Domains: J. Fang, I. H. Parpia and S. R. Kennon 2761

A Non-linear Numerical Method for Accurate Determination of Limit and Bifurcation Points: S. L. Chan 2779

Static and Dynamic Analysis of Wind Turbine Blades Using the Finite Element Method: N. M. El Chazly 2791

Design Optimization of Non-linear Structures with Rate-dependent and Rate-independent Constitutive Models: S. Y. Jao and J. S. Arora 2805

Adaptive and Hierarchical Modelling of Fatigue Crack Propagation: J. Fish and A. Nath 2825

Coincident Collocation of Displacement and Tangent Derivative Boundary Integral Equations in Elasticity: K. H. Muci-Küchler and T. J. Rudolphi 2837

An Improved Numerical Method to Find Parameters Using Experimental Data: I. Qamar and S. W. Husain 2851

CONFERENCE DIARY 2861

Issue No. 17

A General Interaction Analysis for Large Deformations: J. K. Kodikara and I. D. Moore 2863

Boundary Edge Elements and Spanning Tree Technique in Three-dimensional Electromagnetic Field Computation: Z. Ren and A. Razek 2877

A Parallel Row-oriented Sparse Solution Method for Finite Element Structural Analysis: K. H. Law and D. R. Mackay 2895

A New Conforming Quadrilateral Plate Bending Element: I.-W. Liu and C.-C. Lin . . . 2921

Non-linear Co-ordinate Transformation of Finite Part Integrals in Two-dimensional Boundary Element Analysis: J. Hildenbrand and G. Kuhn 2939

Dual Hybrid-Trefftz Element Formulation Based on Independent Boundary Traction Frame: J. Jirousek and A. P. Zielinski 2955

Indirect Finite Element Evaluation of Two-dimensional Finite Part Integral Using Fourier Transformation: T. S. Lee, S. H. Advani and J. K. Lee 2981

A Non-hypersingular Time-domain BIEM for 3-D Transient Elastodynamic Crack Analysis: C. Zhang and D. Gross 2997

Detecting Symmetry-breaking Bifurcation Points of Symmetric Structures: C. Carstensen and W. Wagner 3019

CONFERENCE DIARY 3041

Issue No. 18

Linked Interpolation for Reissner–Mindlin Plate Elements: Part I—A Simple Quadrilateral: O. C. Zienkiewicz, Z. Xu, L. F. Zeng, A. Samuelsson and N.-E. Wiberg 3043

Linked Interpolation for Reissner–Mindlin Plate Elements: Part II—A Simple Triangle: R. L. Taylor and F. Auricchio 3057

An Asymptotic General Model for Linear Elastic Homogeneous Anisotropic Rods: J. A. Alvarez-Dios and J. M. Viaño 3067

A Boundary Element Formulation Based on the Three-dimensional Elastostatic Fundamental Solution for the Infinite Layer: Part I—Theoretical and Numerical Development: F. G. Benitez, L. Lu and A. J. Rosakis 3097

A Boundary Element Formulation Based on the Three-dimensional Elastostatic Fundamental Solution for the Infinite Layer: Part II—Three-dimensional Examples: L. Lu, F. G. Benitez and A. J. Rosakis 3131

A General Methodology for Structural Shape Optimization Problems using Automatic Adaptive Remeshing: G. Bugeda and J. Oliver 3161

Adaptive Multilevel Methods in Three Space Dimensions: F. Bornemann, B. Erdmann and R. Kornhuber 3187

Crack Length Measurements with a Potential Drop Method: A Finite Element Simulation: Y. Ke and P. Ståhle 3205

CONFERENCE DIARY 3221

Issue No. 19

A Fast Error Check for Structural Analysis using the Virtual Force Principle: B. A. Schrefler, G. Zavarise, R. Gori and E. Turska 3223

Finite Element Analysis of Linear and Non-linear Planar Deformations of Elastic Initially Curved Beams: A. Ibrahimbegović and F. Frey 3239

Some Useful Renumbering Strategies for Unstructured Grids: R. Löhner 3259

Dynamic Optimization of Structures with Non-linearities: X. Liu 3271

Modified Fundamental Solutions for the Scattering of Elastic Waves by a Cavity: Numerical Results: L. Bencheikh 3283

A Novel Approach for Devising Higher-Order Hybrid Elements: K. Y. Sze 3303

Hermite Infinite Elements and Graded Quadratic B-spline Finite Elements: L. R. T. Gardner, G. A. Gardner and I. Dag 3317

The Convergence Behaviour of Iterative Methods on Severely Stretched Grids: E. F. F. Botta and F. W. Wubs 3333

An Alternative Pseudoperipheral Node Finder for Resequencing Schemes: L. T. Souza and D. W. Murray 3351

Three-dimensional Infinite Boundary Elements for Contact Problems: M. Liu and T. N. Farris. 3381

BOOK REVIEW 3399

CONFERENCE DIARY 3400

Issue No. 20

Application of a Domain Decomposition Technique to the Mathematical Modelling of a Utility Boiler: P. J. Coelho and M. G. Carvalho. 3401

Finite Element Analysis of Laminated Composites with Contact Constraint by Extended Interior Penalty Methods: S. J. Kim and J. H. Kim 3421

Numerical Design of Thin-walled Structural Members on Account of their Strength: A. L. Kalamkarov and A. G. Kolpakov 3441

A Continuum-based Finite Element Formulation for the Implicit Solution of Multibody, Large Deformation Frictional Contact Problems: T. A. Laursen and J. C. Simo . . . 3451

Pathologies Associated with the Numerical Analysis of Hyper-anisotropic Materials: P. Šimáček, V. N. Kaliakin and R. B. Pipes 3487

The Importance of Diagonal Dominance in the Iterative Solution of Equations Generated from the Boundary Element Method: T. J. Urekew and J. J. Rencis 3509

Finite Element Analysis of Propagating Buckles: H.-W. Song and J. L. Tassoulas . . . 3529

Effects of Element Distortions on the Performance of Isoparametric Elements: N.-S. Lee and K.-J. Bathe 3553

CONFERENCE DIARY 3577

Issue No. 21

An Efficient Numerical Method for Modelling Initiation and Propagation of Cracks along Material Interfaces: G. Beer 3579

Coupling Finite and Boundary Element Methods for Two-dimensional Potential Problems: T. Krishnamurthy and I. S. Raju 3595

Elastic–Viscoplastic Differential Equations on a Manifold Modelling of In-plane Stretching of Sheet Metal: C. A. Hall, L. E. De Carlo, M. L. Wenner and N. L. Troyani 3617

p-Version Least-squares Finite Element Formulation of Burgers' Equation: D. Winterscheidt and K. S. Surana 3629

A Three-dimensional Non-linear Timoshenko Beam Based on the Core-congruential Formulation: L. A. Crivelli and C. A. Felippa 3647

A Variational Boundary Integral Method for the Analysis of 3-D Cracks of Arbitrary Geometry Modelled as Continuous Distributions of Dislocation Loops: G. Xu and M. Ortiz 3675

Two-dimensional Elastoplasticity: Approximation by Mixed Finite Elements: S. L. Weissman and M. Jamjian 3703

Higher-order MITC General Shell Elements: M. L. Bucalem and K.-J. Bathe 3729

CONFERENCE DIARY 3755

Issue No. 22

New Basis Functions and Computational Procedures for *p*-version Finite Element Analysis: P. Carnevali, R. B. Morris, Y. Tsuji and G. Taylor. 3759

A Computational Procedure for Flexible Beams with Frictional Contact Constraints: S. M. Sun, M. C. Natori and K. C. Park 3781

Stress Computation and Consistent Tangent Operator using Non-linear Kinematic Hardening Models: S. Hartmann and P. Haupt 3801

Discrete Micromechanics of Elastoplastic Crystals: R. I. Borja and J. R. Wren 3815

Curvilinear Fatigue Crack Reliability Analysis by Stochastic Boundary Element Method: Y. J. Lua, W. K. Liu and T. Belytschko 3841

Fragmentation Algorithm for Finite Element Failure Simulation and Analysis: D. L. Rice and E. C. Ting. 3859

Physically Correct Penalty-like Formulations for Accurate Pressure Calculation in Finite Element Algorithms of the Navier–Stokes Equations: B. R. Dyne and J. C. Heinrich 3883

A Three-dimensional Multilayer Composite Finite Element for Stress Analysis of Composite Laminates: J. Han and S. V. Hoa 3903

Fully Implicit Integration and Consistent Tangent Modulus in Elasto-plasticity: I. Doghri 3915

CONFERENCE DIARY 3933

Issue No. 23

Incremental Kinematics for Finite Element Applications: M. M. Rashid 3937

Acoustic Boundary Element Eigenproblem with Sound Absorption and its Solution using Lanczos Algorithm: C. Rajakumar and A. Ali 3957

On the Solution of an Ill-posed Design Solidification Problem using Minimization Techniques in Finite- and Infinite-dimensional Function Spaces: N. Zabaras and S. Kang 3973

Flow Past a Cylinder with and without an Appurtenance: H. R. Tamaddon-Jahromi, P. Townsend and M. F. Webster 3991

A New First-order Interior Feasible Direction Method for Structural Optimization: N. Stander and J. A. Snyman 4009

A Fully Non-linear Axisymmetrical Quasi-Kirchhoff-type Shell Element for Rubber-like Materials: R. Eberlein, P. Wriggers and R. L. Taylor 4027

Modelling Edge Effects with the C^0 Plate Bending Elements: Part 1. Analysis of the Mechanism: D. Briassoulis 4045

Modelling Edge Effects with the C^0 Plate Bending Elements: Part 2. The Performance of the Reformulated Four-node Element: D. Briassoulis 4069

CONFERENCE DIARY 4111

Issue No. 24

An Analysis of Some Higher-order Triangular Elements and their Susceptibility to Hourglassing in Lagrangian Fluid Simulations: A. Priestley 4115

A Parametric Study on Achieving the Same Final Shape by Numerical Experimentation Using a Shape Optimization Process Subject to Different Initial Conditions: A. A. Gates 4127

An Efficient Method for Solving the Eigenvalue Problem for Matrices Having a Skew-symmetric (or Skew-Hermitian) Component of Low Rank: S. D. Garvey 4151

A Streamline-upwind-full-Galerkin Method for Space–Time Convection Dominated Transport Problems: P. Perrochet 4165

Geometrically Non-linear Method of Incompatible Modes in Application to Finite Elasticity with Independent Rotations: A. Ibrahimbegović and F. Frey 4185

Configuration Design Sensitivity Analysis of Built-up Structures Part II: Numerical Method: S.-L. Twu and K. K. Choi 4201

Hybrid and Mixed-penalty Finite Elements for 3-D Analysis of Soft Hydrated Tissue: M. E. Vermilyea and R. L. Spilker 4223

H-Adaptive Finite Element Methods for Dynamic Problems, with Emphasis on Localization: T. Belytschko and M. Tabbara 4245
